# Biggest scientific computing project

# **Largest** collaborative scientific project

> 7000 scientists

85 countries

Total project cost  
\$9 Billion

# ...And A Sociological Marvel

**38** countries

**134** universities & institutes

**CMS**

**~ 2000** physicists

**WHY ?**

Where Do We Come From?

What Are We?

Where Are We Going?

Paul Gauguin (1897)  
Museum of Fine Arts, Boston

# The Atomic Hypothesis

By convention there is color,  
By convention sweetness,  
By convention bitterness,  
But in reality there are  
**atoms** and **space**

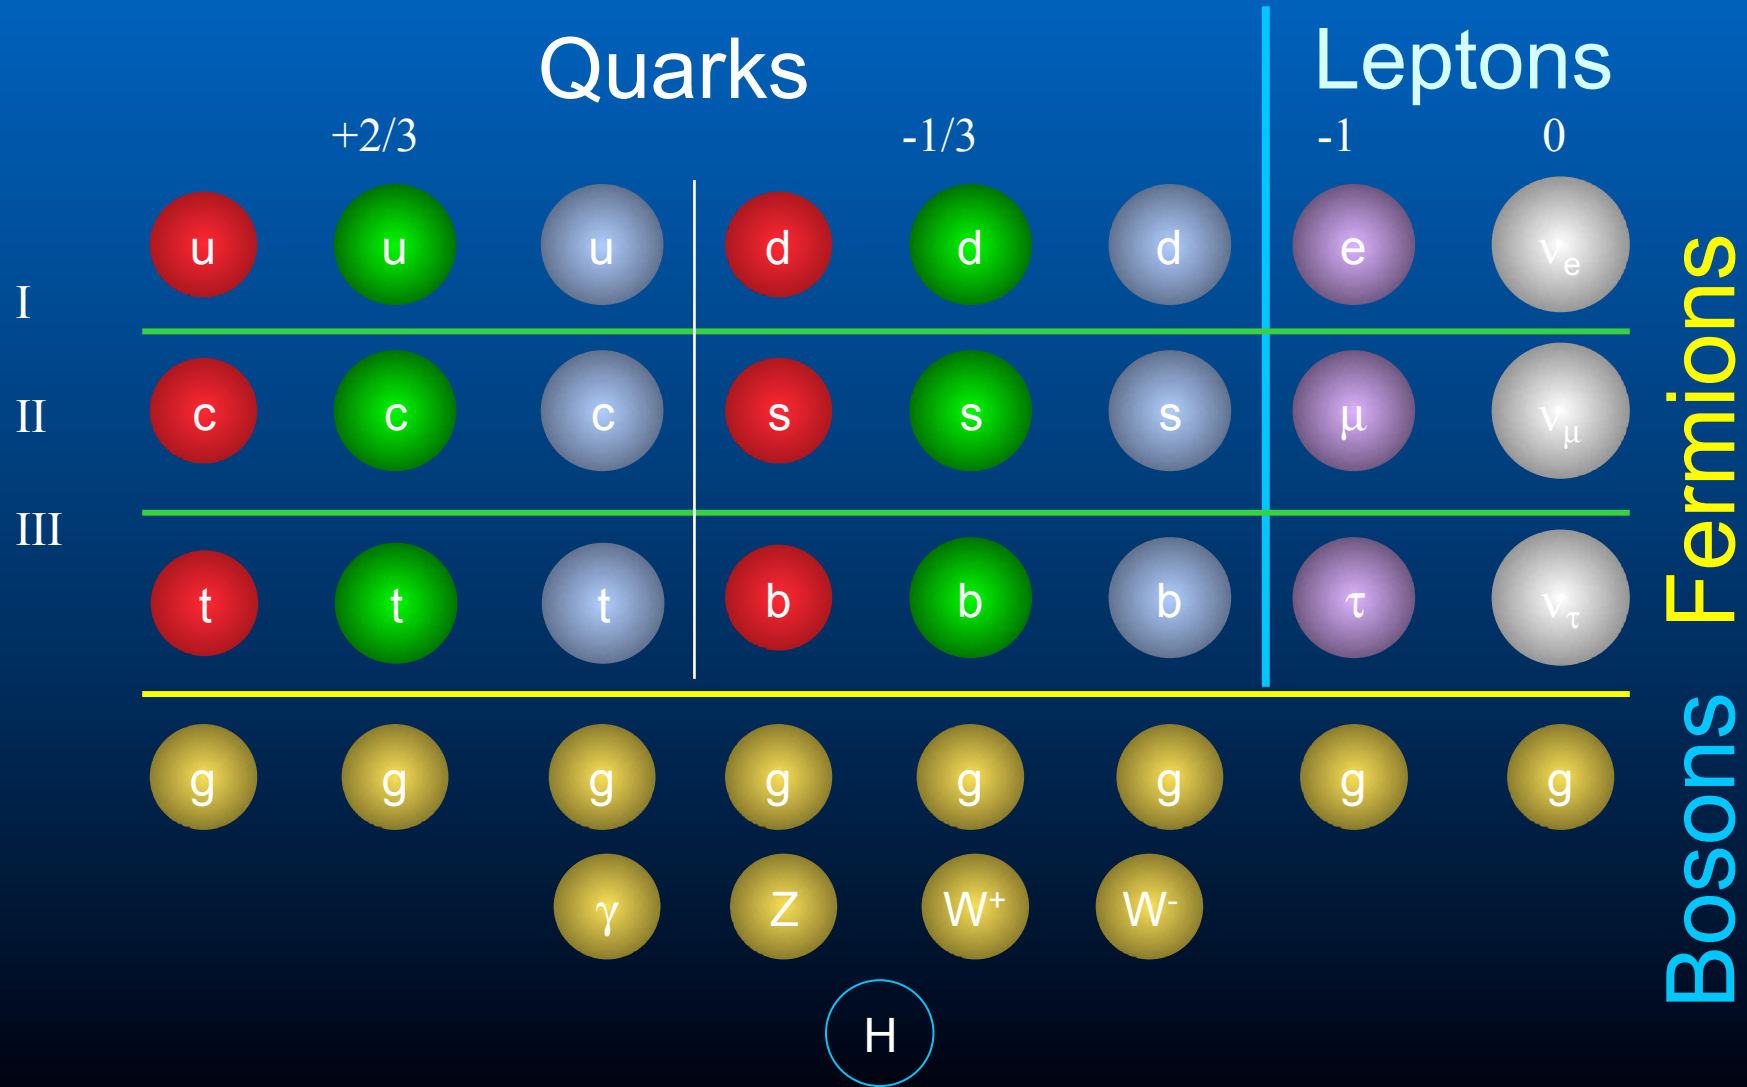

Democritus (400 B.C.)

# The Atomic Hypothesis...

# The Atomic Hypothesis, circa 2011

# Bosons manifested as forces

**Strong Force**

**1** (Gluons)

Binds quarks to form protons, neutrons, and nuclei

**Electromagnetic Force**

**$10^{-2}$**  (Photon)

Binds electrons and nuclei to form atoms

**Weak Force**

**$10^{-5}$**  (W & Z Bosons)

Causes radioactivity

**Gravitational Force**

**$10^{-39}$**  (Graviton)

Binds matter on large scales

Prediction: A quark is surrounded by a cloud of color charge

A sufficiently violent impact can dislodge the quark from its cloud, and thus temporarily

lower the quark's effective charge

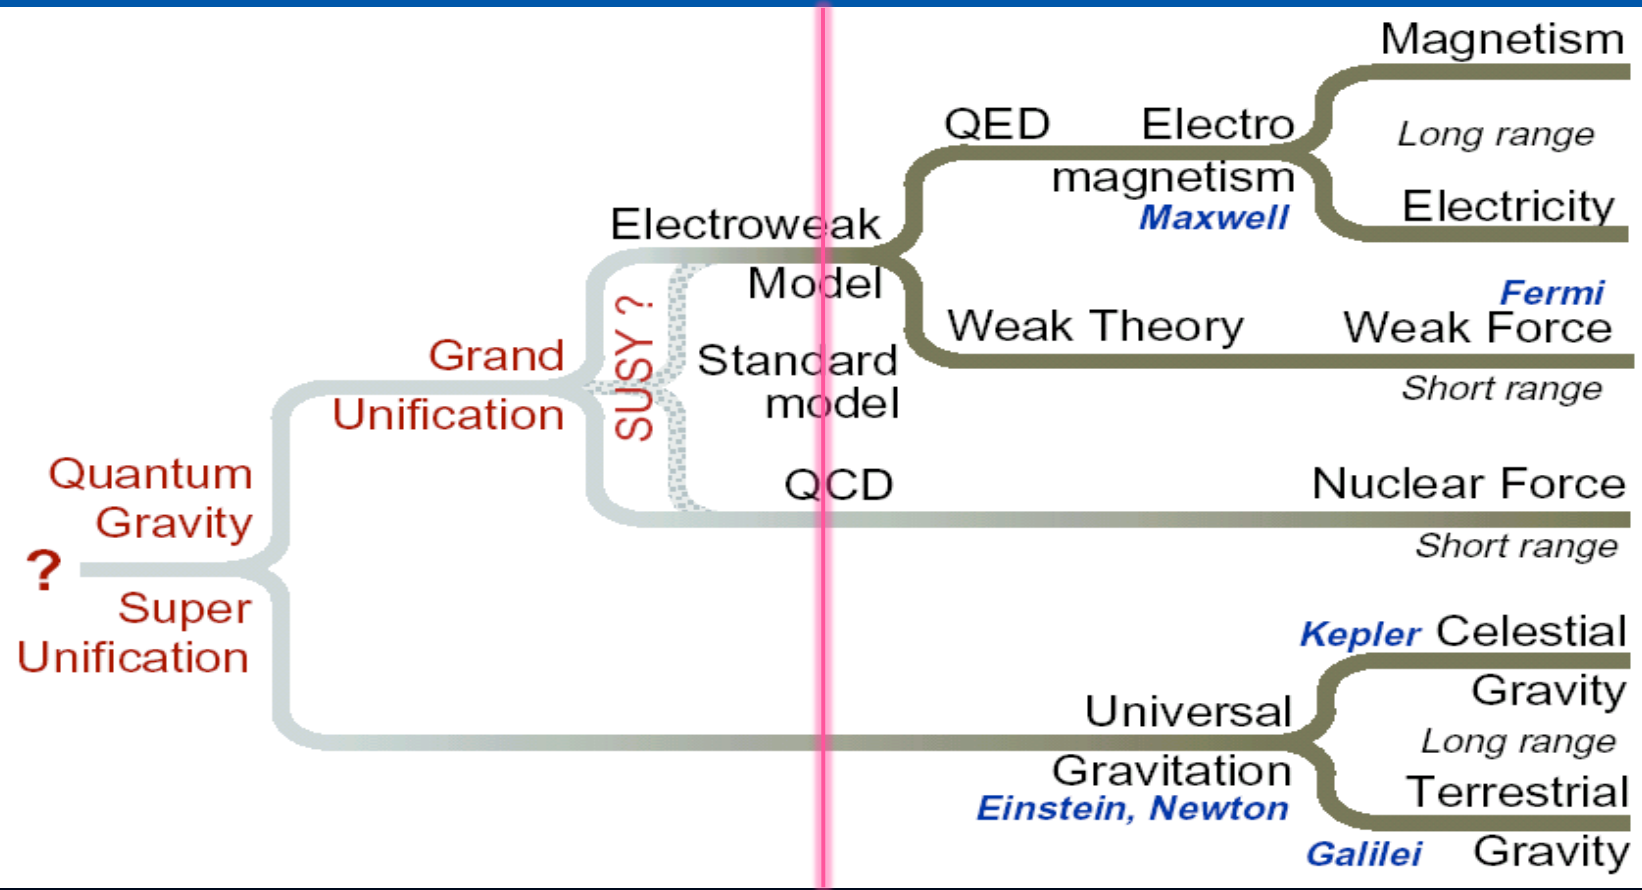

# Experimental verification

Quarks become  
quasi-free  
when struck  
hard enough

(**asymptotic  
freedom**)

...but, we must venture Beyond

...**BECAUSE**...

...of the things we don't understand

### The Mass Puzzle

Why do quarks and leptons have mass?

### The Identity Puzzle

What makes an electron an electron, a top quark a top quark, etc.?

### The Matter Puzzle

Why is there overwhelmingly more matter than antimatter?

...more things we don't understand

### The Just-So Puzzle

Do we need to explain the Standard Model parameters, e.g., the quark masses?

### The Dark Matter Puzzle

What is dark matter?

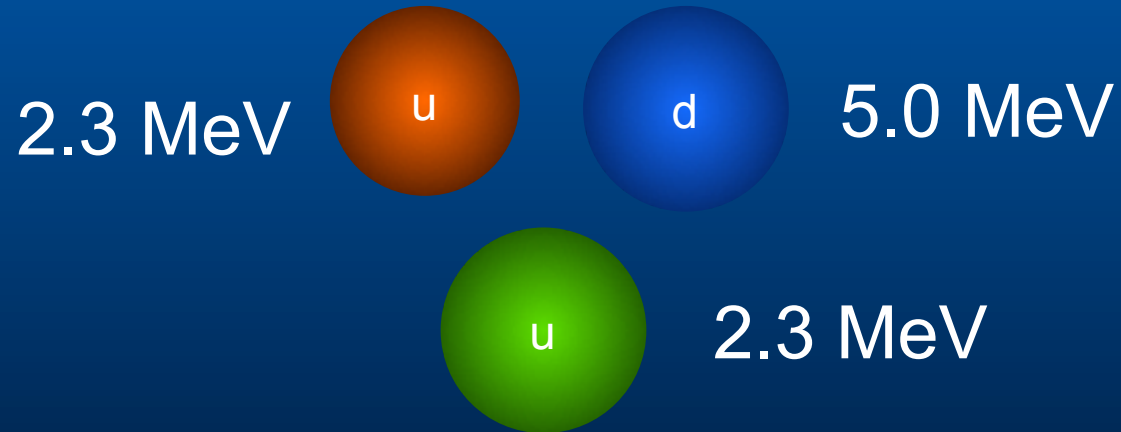

### The Dark Energy Puzzle

What is dark energy?

# The Mass Puzzle

The Higgs hypothesis: particle masses arise from the interaction of (massless) particles with the Higgs field

$$m = \frac{E}{c^2}$$

Total mass **9.6** MeV

But, proton mass is **938** MeV !

# The Just-So Puzzle

2.3 MeV  
2.3 MeV  
5.0 MeV  

---

9.6 MeV

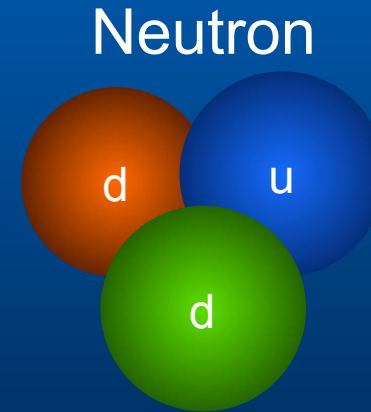

938.3 MeV  
– 9.6 MeV  
**928.7 MeV**

5.0 MeV  
5.0 MeV  
2.3 MeV  

---

12.3 MeV

939.6 MeV  
– 12.3 MeV  
**927.3 MeV**

Do we need to explain this?

“There must be more matter than stars.....”

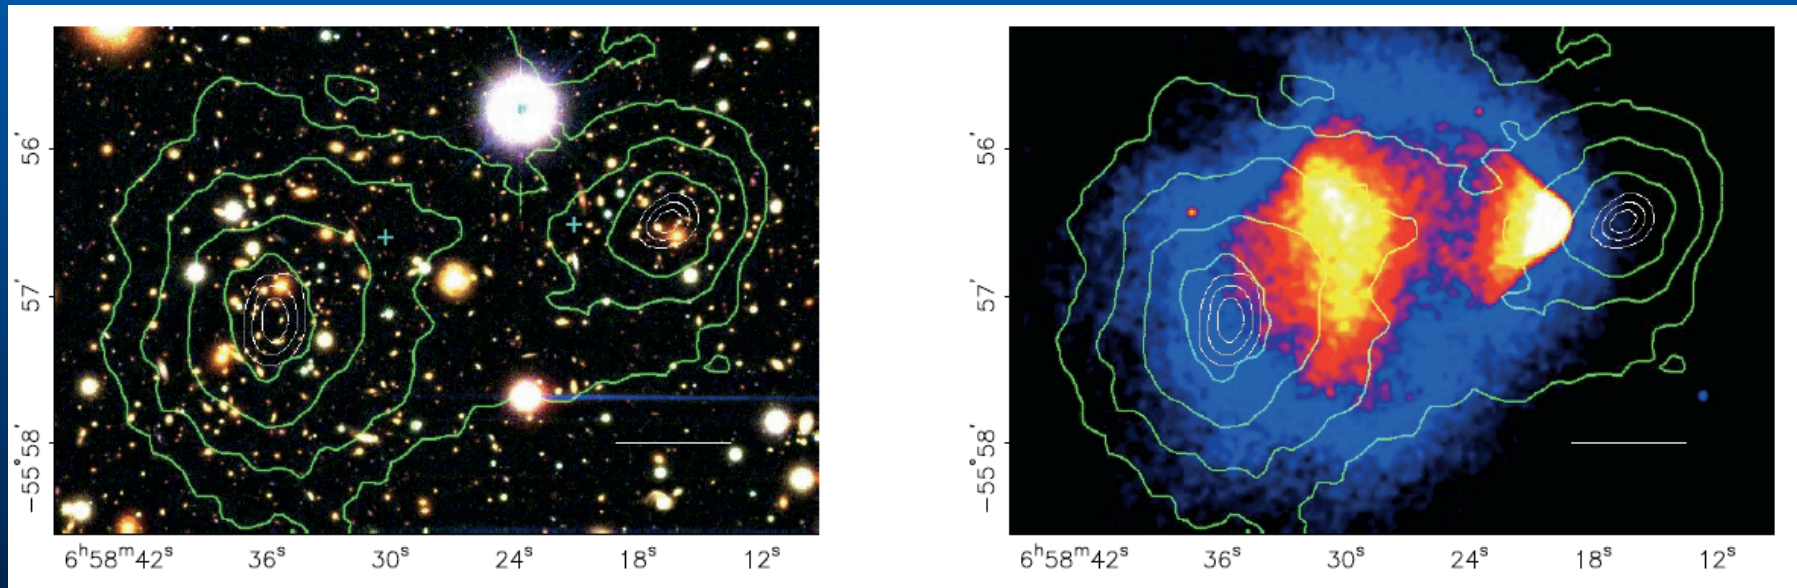

Jan H. Oort (1932)

nine-tenths of Coma Cluster is  
made of dark matter

# The End

“I do not know what I may appear to the world; but to myself I seem to have been only like a boy, playing on the seashore, and diverting myself, in now and then finding a smoother pebble or a prettier shell than ordinary, while the great ocean of truth lay all undiscovered before me.”

Sir Isaac Newton

Many thanks to the taxpayers of the World
